

montawms®

Smart software for optimal e-commerce
logistics with MontaWMS Start

As a fast-growing e-commerce business, you're likely seeing your order volumes steadily increase. Naturally, you want a straightforward way to stay in control of your stock and shipping—without having to rely on complex systems designed for large-scale warehouse operations.

MontaWMS Start has been developed specifically with this in mind – a streamlined version of our full warehouse management system. Developed and tailored for online retailers with ambitions to grow. You stay in control, while benefiting from Monta's expertise, competitive shipping rates and user-friendly software.

Excellence by experience

Monta is the trusted logistics partner for over 3,000 brands in Europe. Since 1999, innovation in ecommerce logistics has been at the heart of everything we do. Not only do we demonstrate this in our 20+ warehouses in Europe, but we also showcase this with MontaWMS as a software solution for ecommerce brands managing their own warehouse.

With MontaWMS, you can benefit from Monta's experience and expertise to ensure your warehouse has optimal order processing capabilities. Our tools guarantee lightning-fast and error free order processing, which is why we are the market leader in the Netherlands for reliable software and hardware. Efficient order processing with our WMS saves you time, space and money, which you can then re-invest back into your brand.

We are the WMS that grows with you, whether you have 100 or 10,000 orders per day and whether you are just starting to automate your warehouse or you are ready to dive into Smart Warehousing with autostores and robotisation. MontaWMS offers smart software and unique hardware so that you can continue to grow without limits.

Shipping Your Orders

In addition to providing access to software that optimizes your warehouse processes, we also help you ship your packages. How? That depends on the number of orders you process.

- Option 1: You drop off your packages at Monta**
You drop off your labelled parcels at a Monta fulfilment centre. You hand them in, and we'll ensure they're transported by the right carrier.
- Option 2: A carrier picks up the packages directly from you**
You pack your shipments and print the shipping labels using our software. The carrier picks up the packages directly and takes care of the rest!

With **MontaWMS Start**, you have access to the following features in the **MontaPortal**:

- ✓ **24/7 Visibility** of your orders, inventory, and locations
- ✓ **Integrations** with a wide range of e-commerce platforms and marketplaces
- ✓ **Choice of carrier(s)** with easy printing of picking slips and shipping labels
- ✓ **Access to conversion-boosting features**, such as the checkout module (multi-carrier feature) and the returns module
- ✓ **Tools to optimize your warehouse**, allowing you to create your own racking, implement efficient picking routes and improved logistics workflows!

Monta's services:

Monta Fulfilment
